

# Analysis Of Datasets

1. CSE-CIC-IDS2018 on AWS - <https://www.unb.ca/cic/datasets/ids-2018.html>

This consists of 7 type of attacks, related attackers and victims IP, Date, start and finish time of attack. It then provides the features extracted based on these.

2. IOT-23 DATASET - <https://www.stratosphereips.org/datasets-iot23>

Here the explanation of labels are provided with different malicious flows detection.
